24key IR remote controller

24key IR remote controller can be used in many led product like led module, led flexible strip, led point light etc. The advantage of this IR controller is low price and very easy to install and long lifetime. User can use the 24key board to control the brightness in static and speed in dynamic effect.

Specifics:

1,Working temp:-20~60°C

2, Input voltage: 12Vdc, (if need 5V, or 24v, please specify)

3, Output: 3 way

4, Connect way: Common anode or common cathode

5, Output power: 72W for 12vdc

6, Size: 63x35x22mm

7, For 5050 led strip, it can control 300leds.

The 24key on the panel represent effect as below sheet

Brightness +	Brightness -	Off	On
Static red	Static green	Static blue	Static white
Static orange	Static shallow green	Static dark blue	7 color jumpy change
Static dark yellow	Static cyan	Static brown	All fade out and fade in
Static yellow	Static shallow blue	Static pink	7 color fade change slowly
Static shallow yellow	Static pale blue	Static purple	RGB flicking
